

Greenguard[®]

window bag for potatoes

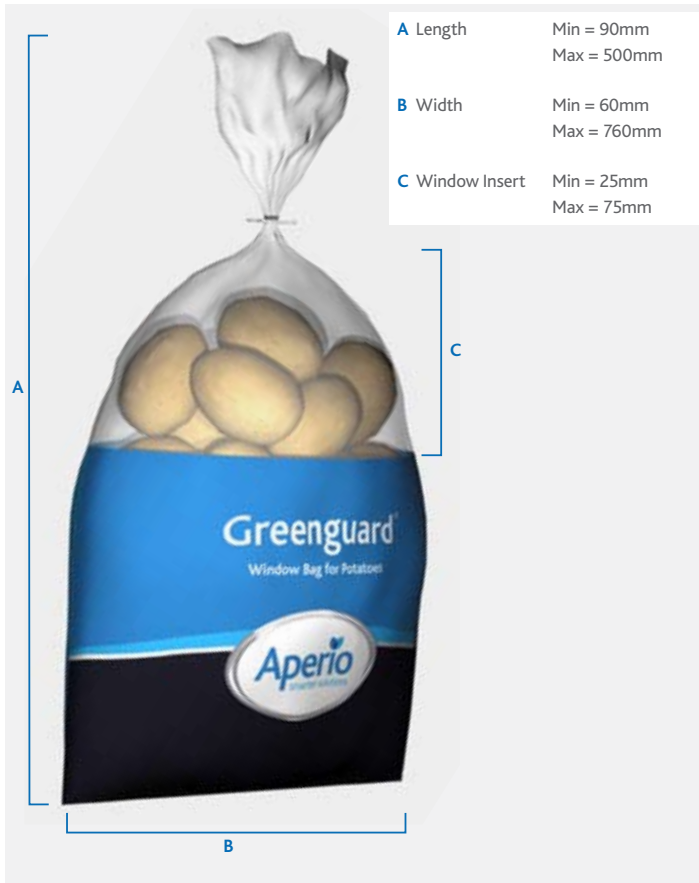

Aperio
smarter solutions

Greenguard[®] is a unique packaging solution for superior presentation and protection of potatoes.

Features and Benefits of Greenguard®

Feature	Advantage	Benefit
Greenguard® Black / White Protection Film	Provides protection from harmful UV light that will turn potatoes green	Potatoes have a longer shelf life to meet consumers' quality expectations
Printed front panel with high colour graphics	Provides the opportunity to present high quality graphics and branding on front of pack	Enables shelf impact and allows presentation of recipes, organic descriptions and nutritional panels
Pre-packed product	Maintains hygiene and reduces spoilage throughout supply chain	Reduced handling in store provides increased turnover and less spoilage
Wicketed format	Increased output and reduced labour costs as bags run on standard wicket packaging equipment	Cost advantages for packers and no investment required on new packaging machinery
Barcode ability	Enables stock management of pre-packed potatoes	Improved stock control over loose produce and less spoilage
Window panel for viewing	Polyethylene film provides protection from harmful UV rays	Window allows viewing of contents and stops greening of potato

Bag Sizing

Greenguard®

Greenguard® bags combine:

- Black/White light reduction
- The functionality of a printed bag
- A viewing window to inspect the contents of the package.

Supplying pre-packed produce in Greenguard® wicket bags ensures:

- Produce to remain fresh – from the grower to the consumer
- Less spoilage – from reduced handling.

The high quality branded graphics:

- Complement the produce being packed; and
- Are highly recognised – within the produce industry and by consumers.

Materials and Printing

- Bag material choices are governed by packed weight and packing machinery
- Printing up to 10 colour Flexographic is available.
